

## CAD Detailer

Drafts detailed drawings of parts of machines, structures or equipment, to be used in fabrication, from rough or general design drawings. Utilizes knowledge of various machines, engineering practices, mathematics, building materials, and other physical sciences to complete drawings.

Shows dimensions, material to be used, welding procedures and other information necessary to make detailed drawing clear, complete and accurate for shop fabrication. Produces material and cutting lists for use by other company personnel as well as programs for CNC equipment.

Checks drawings for completeness and accuracy and may work directly with customers, contractors, engineers or project managers to answer question about the detail they have produced.

Experience with 3D Modeling programs preferred.
