

CNC Machine Operator

Sets up and operates numerical control machines and manual machines to cut, shape, drill, shear, punch or form metal workpieces to specification. Reviews cut sheet and specifications and/or blueprints to determine machine setup or piece layout, procedure to follow, machining sequence, and dimensions of finished workpiece.

Loads material to work area, cuts it and verifies piece dimensions are accurate. Loads control media, such as disk or file from e-mail in machine control console or enters commands to retrieve preprogrammed machine instructions from database or types in previously prepared program or prepares program themselves. Prefer H.S. Diploma or G.E.D.
